B. BHIMA RAO,
For *Deputy Commissioner, Treasury Department.*

Notice dated 29th August 1913.

In view of the outbreak of a formidable insect pest—the green bug, and in order to check its spread, assist in its extermination and prevent further introduction into the Mysore State, it is very necessary that all plants imported and exported into Bangalore by private dealers and nurserymen, should be fumigated.

It has been the practice at the Lal-Bagh, for the last one year, to fumigate all plants coming into and going from there—a fumigatorium having been erected for the purpose.

The cost of fumigating 100 plants at a time comes to about annas 8, but, in order to popularize the practice and also to encourage private dealers to come forward, the Government of His Highness the Maharaja of Mysore, are pleased to sanction for one year, the free fumigation of all plants, imported and exported.

Fumigation requires experience and certain facilities, and when carefully done will not injure the most delicate plant. The time taken for fumigation is ordinarily between half to one hour.

A certificate will be granted by the undersigned to those who have had their plants fumigated, and buyers are advised to demand such certificates when ordering plants.

Those interested are requested to communicate with the undersigned for fuller particulars.
